YDM 3109

Digital door locks
User Manual
Keep this manual safe for future reference

※ The functions and design of this product can be changed without notice for quality improvement.
※ Chinese manual is from 33 page. (中文说明书从第33页)
Please read the following before using your Yale GATEMAN product

- This product is designed and manufactured to assure personal safety. Improper use can result in personal damage or property loss. Please observe the procedures for installation, use and servicing.

- Yale GATEMAN is a precision electronic device. All safety and operating instructions should be read before the product is operated.

- Refer all servicing to qualified service personnel. Servicing is required when the product is damaged or to be re-installed.

- Check your installation conditions with the local service provider before installation as your door prep might be different from the standard this lock conforms with.

- The products warranty does not cover defects or damages arising from the door defects, improper installation, lack of or improper maintenance, improper storage, shipping and handling, ordinary wear and tear, misuse, abuse, accident, unauthorized service or use with unauthorized service parts.

- Disassembly, rework and reverse engineering are prohibited without a written approval of Yale except for a normal installation of the product.

- The trademarks, trade names, designs, copyright, patents and other proprietary right used on or embodied in the product and this manual shall remain the exclusive property of the manufacturer, cannot be copied or used in any form without the written authorization by Yale.

- Visit our website www.yalelock.com for more information on the products.

- The information in this manual is subject to change without notice.
Please read the following safety instructions to prevent any accident, property damage and inconvenience. Children should be well educated for the operating instruction. Keep this manual in a convenient place so that you can refer to it when necessary.

**Caution** must be followed to protect yourself and your property.

*Note* explains product functions and features.

- **prohibited**
- **must observe**

Yale GATEMAN digital door lock is a precision electronic device.

Clean only with dry cloth. Do not use water that can cause damage to the electronic circuit.

Do not attempt to disassemble the unit by yourself. That can cause an electronic shock and product damage.

When you move, contact your local service personnel for re-installation. Check the service charge with your service provider.
Do not use water and any type of solvent such as gasoline or benzene as they can cause damage to electronic circuit, deterioration and/or paint peel-off.

Be careful not to have an unauthorized user know your security code. Change your code periodically.

Do not use an inappropriate tool that can cause damage or malfunction of the product.

Handle the unit with care. Excessive force, careless handling may cause product damage.

Be careful not to have an unauthorized user know your security code. Change your code periodically.

Do not use water and any type of solvent such as gasoline or benzene as they can cause damage to electronic circuit, deterioration and/or paint peel-off.

Do not have your card key lost or stolen.

Immediate re-registration of all remaining keys is required to invalidate the lost key.

Do not use an inappropriate tool that can cause damage or malfunction of the product.

Handle the unit with care. Excessive force, careless handling may cause product damage.

Be careful not to have an unauthorized user know your security code. Change your code periodically.

Do not use water and any type of solvent such as gasoline or benzene as they can cause damage to electronic circuit, deterioration and/or paint peel-off.

Do not have your card key lost or stolen.

Immediate re-registration of all remaining keys is required to invalidate the lost key.

Educate your children about the proper use of the product.

Make sure the door is securely locked whenever you leave your house, especially in the manual lock mode.

Make sure the distance between the door and door frame is not widened more than 5mm.

Keep card key reader part clean and dry. Dust off dirt smoothly with a soft cloth.

Remove all of the batteries before installing or removing a remote control module.

Make sure the distance between the door and door frame is not widened more than 5mm.

Educate your children about the proper use of the product.
**Overview**

- **Proximity card identification**
  You can use your ISO 14443 A type RFID card such as credit card or pass card as your card key.

- **Triple access**
  You can unlock the door by the card, the security code or the mechanical key at your convenience. You do not need to worry about accidental lockouts by losing or forgetting the key.

- **Easy re-registration of keys**
  If you lose a key, you can invalidate the lost key by re-registering all other keys. You can register up to 40 card keys to add users.

- **Anti-collision**
  Contacting multiple cards does not cause error to the lock. The card key reader will recognize the card key among a pack of cards.

- **Safe handle**
  Protects from any break-in attempts through the safe handle.

- **Verification with the palm**
  The security code is verified by palm touching to randomize any fingerprint residues on the keypad so protect from exposing it.

- **Emergency power supply**
  When the batteries are completely discharged you can easily supply emergency power to the lock with the 9V battery.

- **Volume control**
  You can change the volume. The break-in alarm still operates even if the silent mode is on.

- **Forced lock mode**
  Internal forced lock prevents anyone to unlock from the outside and external forced lock makes only manual thumbturn available to open the lock from the inside.

- **Remote control**
  You can use a remote control by installing the applicable Remote control module. (This option may not be available depending on your country or local dealer.)

- **Break-in / Damage alarm**
  80dB alarm will go off if anyone attempts to damage the lock or forces the door open.

- **Smart Pad**
  Keypad displays functional operation with lighting.
Basic Operation

Please do remember below operation!

1. Card Key Registration:
   - Press the [1] button
   - Contact all the keys you wish to register one by one

2. Security Code Registration:
   - Press the [1] button
   - Enter the security code (6~12 digits)
   - Press the [1] button

3. Locking the door from the outside:
   - The automatic Lock Sensor detects the door closing and locks the door within 5 seconds, or
   - Touch the keypad with palm for locking the door in [Manual Lock Mode]

4. Unlocking the door from the outside:
   - Contact Card key
   - Wake up the lock with the palm touch, enter the security code and retouch the lock with the palm.

5. Automatic / Manual Lock Mode:
   - Automatic Lock Mode:
     - Press the [A] button
   - Manual Lock Mode:
     - Press the [M] button

6. Forced Locking:
   - Forced Lock Mode from inside.
   - With the palm Contact 5 seconds
   - Forced Lock Mode from outside.
   - Contact 3 seconds after putting security code

7. Volume control:
   - Mute: [Volume] Button
   - Normal: [Volume] Button
   - Loud: [Volume] Button

8. Turning off the alarm:
   - Contact the card key on [card key reader], or
   - Enter the security code, or
   - Press and hold [ ] button for 5 seconds

9. Emergency power supply:
   - 9V Battery can be used to supply electricity to the unit.

- Lock case
- Latch Bolt
- Automatic Locking Sensor
- Dead Bolt
- Keypad (10-Key)
- Card Key Reader
- Dead Bolt Jam Lamp
- Battery Change Lamp
- Lever
- Reset button
- Emergency Key
- Emergency Power Supply Terminal
- 9V Emergency battery (Optional)

※ Pull down Emergency Cover

Identification of Product
2. **Back** (Back Body, install on the inside of the door)

- **Battery Cover**
- **Registration button**
- **Lever**
- **Manual thumb turn**
- **Internal Forced Lock Switch**
- **1.5V AA Alkaline Batteries (4EA)**
- **Slot for Remote control module (Option)**
- **Auto / Manual Lock button**
- **Volume Control Switch**
- **Safe handle button**
How to Use

1. Registering Card Keys

**Caution**
- Keep the door open while you register card key to prevent yourself from accidentally getting locked out.

**Note**
- 4 card keys are provided at purchase and you can register up to 40 card keys.
- If you lose your current card key, re-register all the remaining keys to invalidate the lost key.
- Contact your local dealer for additional card keys.
- ISO 14443 A type RFID card can be registered as your card key.

⚠️ All card keys should be registered at a time.
Press [Registration] button

Open [Battery Cover] and Press [Registration] button.

Contact all the card keys you wish to register on the [card key reader] one by one

If you hear a “pik” sound, the card keys are registered. If you hear a “ti-to-ti-to” sound, the card key had been already registered.

- The numbers of registered cards are shown on the keypad.

Check the key operation

Opening the door with your card key. Contact your card key to [card key reader]

Opening the door with your card key
Touch the keypad with the palm. Contact card key
2. Registering Security Code

**Caution**
- Keep the door open while you register the security code to prevent yourself from accidentally getting locked out.

**Note**
- Set a code of 6~12 digits using the number buttons
  - 000000 ~ 000000000000
- The old code is automatically deleted when registering a new code.

1. Press [Registration] button
2. Enter your security code
3. Press [Registration] button
4. Check your security code

**How to Use**
- Press [Registration] button
  - The registration is completed with a “pi-bi-bing” sound.

- Enter your security code
  - Enter the code you wish to register. (6~12 digits)

- Check your security code
  - When registering the security code, it shows what the user has just registered in order.

- Opening the door with your code
  - Touch with the palm [keypad]
3. Locking the door from the outside

* Please check Automatic / Manual Lock Mode

**Automatic lock mode**

The automatic lock sensor detects the door closing and locks the door automatically within 5 seconds.

**Manual lock mode**

The door locks when touch the keypad with the palm.

---

**Caution**

As the automatic lock function does not work in manual lock mode, make sure to check that the door is securely locked when leaving the premises.
4. Unlocking the door from the outside

Unlocking the door with card key

1. Contact card key

2. Confirming the door open

Security code (Normal)

1. Touch the keypad with the palm

2. Enter your security code

3. Touch the keypad with the palm again or press * button

4. Confirming the door open

- The keypad cannot be operable in case of wearing the glove.
- Using the palm or pressing * button do the same function after entering the security code.
- If the card key does not work properly, please contact the card key after touching the keypad with the palm.
Opening the lock by the fake PIN code

- This explains how to open the lock with the fake PIN code.

1. **Opening the lock by the fake PIN code**
   - Touch the keypad with the palm
     - Please slightly touch the exterior keypad.

2. **Press any number (fake PIN code) and the right PIN code**
   - Fake PIN code → Right PIN code
   - Right PIN code → Fake PIN code

   **Caution**
   - This feature is not working when the lock is locked down due to wrong-try lock-out delay.

3. **Confirming**
   - Please slightly touch the exterior keypad or press ✶ button to finish.
   - The lock is unlocked with melody (“Pi-bi-bing”)

**Caution**
- When any incorrect PIN codes are inputted five times in a row, it turns the lock down for three minutes.
- When this function is on, the user cannot use the fake PIN code function until any normal verification through key, card, fingerprint, PIN code, or opening the lock from inside is made. So, the user is encouraged to use the right PIN code without any fake number to verify the lock.

**Note**
- Use the fake PIN code feature whenever there is any chance of exposing the right PIN code to others.
5. Locking the door from the inside

**Automatic lock mode**
When set on automatic lock mode, the automatic lock sensor detects the door closing and locks the door automatically within 5 seconds.

**Manual lock mode**
Use [manual thumb turn] on the back body.

6. Unlocking the door from the inside

1. Down the lever while pressing the Safe handle button
2. Turn the manual knob
7. Enabling/disabling Safe handle

GATEMAN YDM3109 protects from any break-in attempts through the Safe handle button.

Factory default: Enabled status

**Enabling Safe handle**

Take out the hexagon wrench which is docked in the battery cover.

Turn the fixing bolt on the side of the inner lever to the left until the Safe handle button pops out.

**Disabling Safe handle**

Take out the hexagon wrench which is docked in the battery cover.

Turn the fixing bolt on the side of the inner lever to the right while pressing the Safe handle button.

---

**Caution**

Be careful not losing the fixing bolt when you loosen it to set the feature on.
Egressing when the Safe handle egress button is on

1. Down the lever while pressing the Safe handle egress button

Example

Caution

- The locking bolt would not be retracted in case of not pressing the button.
- When the fire detection sensor is on, the feature is still on so the user must follow the usual procedure to open the door.
8. Automatic / Manual Lock Mode

Automatic locking sensor which detects the door closing and automatically locks the door in 5 seconds. Automatic lock mode is a factory default setting.

Setting it on automatic lock mode

Push up the Button on \( \text{A} \) Mode.

Setting it on manual lock mode

Push down the Button on \( \text{M} \) Mode.
9. Forced Lock Mode

External forced lock mode

1. Setting external forced lock mode on with the card key
   - Contact card key
     - Contact the card key on [card key reader] for 5 seconds until you hear 3 beeps.
     - "Di-ri-ric" sound.
   - Confirming external forced lock
     - External forced lock mode is set on with "Di-ri-ric" sound.

2. Setting external forced lock mode on with the security code
   - Touch the keypad with the palm
   - Enter the security code
     - Press # button for 3 seconds until you hear 3 beeps
   - Confirming external forced lock
     - External forced lock mode is completed with "Di-ri-ric" sound.

Internal forced lock mode

When internal forced lock mode is on, the keypad is not functioning.
A warning beep sound will go off if anyone attempts to verify by the security code or the card from outside.
10. Break-in/Damage alarm

80dB alarm goes off when the lock is damaged or anybody breaks in by force while the door is locked.

Turning off the alarm

(Choose one of the four options below.)

Enter your security code

Contact your card key

Press and hold [Registration] button for 5 seconds

Press [Unlock] button on the remote control
11. Wrong-try Lock-out

No keypad function is available during this wrong-try lock-out delay. The break-in and damage alarm work regardless of this function.

- If incorrect security codes or unregistered card keys are attempted 5 times in a row, it will lock out for about 3 minutes with the blinking LED.

- The system will resume the operation automatically after 3 minutes of lock-out. If you press [Registration] button on the back body or down the lever while pressing the Safe handle egress button, it resumes the operation.
12. Volume control

This function can control the operating sounds so that the door can be opened and closed without disturbing others.

<table>

</tbody>
</table>
13. Battery use & Replacement

**Battery life (stand alone)**
This product uses 4 1.5V alkaline AA batteries which can be used approximately 10 months on the condition of 10 times open/close cycles per day.

**Battery replacement warning**
Replace all 4 batteries when the low battery warning melody rings and the LED turns red. (Use authentic alkaline batteries)

**Caution**
- Always check + and - directions when inserting batteries.
- Use the authentic alkaline batteries. It is a user’s responsibility for damage caused by using unauthentic batteries.
- Risk of explosion if battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions.

※ Battery life may vary due to temperature, moisture, frequency of use, and the quality of the batteries.
14. Displaying operation status (Smart Pad)

1. Battery Replacement warning
   - Battery Icon lights on.

2. Dead Bolt locking motion warning
   - Locking Icon lights on.

3. Wrong-try Lock-out warning
   - If incorrect security codes or unregistered card keys are attempted 5 times in a row, it will lock out for about 3 minutes with the blinking LED.

4. External / Internal forced locking
   - Starting from the left column, the LED comes on from left to right to left for twice.

5. Break-in / Damage warning
   - The LED keeps coming on to the clockwise when a break-in or damage is happened. (Alarm lasts for 30 minutes)

6. Security Code registration
   - When registering the security code, it shows what the user has just registered in order.
   - (Right: In case of registering 1, 2, 3, 4, 5 and 6)

7. Card Key registration
   - When registering the card keys, Keypad displays the number of registered card keys.
   - (Right: 3 is on → 3 keys have been registered)
1. Remote control module

Remote control module should be installed in advance to use remote control. Open [battery cover] and insert the module into the slot. Proper functioning of the module can be checked by operating a remote control.

Installing remote control module

1. Open [battery cover] and remove all batteries
2. Insert remote control module into the slot
3. Put batteries back in (Check +, - directions)
4. Confirming
2. Remote control

The remote control is an FSK (Frequency Shift Keying) type that uses a Floating ID encoding system, which changes the wireless code each time you use it, so that there is no risk of hacking. It is non-directional and the operational range is up to 10~20m.

※ Caution! The operational range may vary depending on the installation environment. Re-registration automatically deletes the previous registered remote control.

### Registering remote control

1. Press [Registration] button
2. Press #, 0, 5 buttons
3. Press [Registration] button located on the front of the remote control with a pin
4. Press [Registration] button
5. Check remote control operation

You can register up to 5 remote controls consecutively. In order to register consecutively, press [Registration] button on each remote control with 10 second intervals. Remote control makes a beep when it is properly registered.

Press [open] or [close] button to check the operation
Deleting remote control registration

1. Press [Registration] button
2. Press #, 7, 5 buttons
3. Press [Registration] button
4. Deleting remote control registration
Remote control registration is cancelled with a “di-ri-ring” sound.

How to use the remote control

Locking the door
Press [close] button, and the door will lock within 2~3 seconds.

Unlocking the door
Press [open] button, and the door will unlock within 2~3 seconds.

Changing the batteries
Open up the battery cover at the back of the remote control and change the batteries.
5 Cautions

1. Emergency power supply

In case the batteries are completely discharged, a 9V battery can be used to supply electricity to the unit. Unlock with the card key or security code while contacting a 9V battery just like the below instruction. Discharged batteries should be replaced right away.

1. Discharged
2. Holding a 9V battery
3. Security code use
   - Touch the keypad with the palm. Enter the security code and re-touch the keypad or press * button.
4. Change Batteries
   - Replace all of the batteries
5. Confirming
   - Check out if a card key and security code work properly after replacing all batteries.
2. Lost card key

If you lose your card, rest of card keys must be re-registered to invalidate missing one.

⚠️ Caution

Enter the security code in case you lose the card key or you are not carrying it.
※ It is a user’s liability to break the lock because the user did not register any security code.

3. Product malfunction

Press reset button located in the left of [emergency power terminal] with a pin and try again with the key or the security code.
If it still does not work, call for after-sales service.
4. Emergency mechanical key override

Please operate the lock with the mechanical key when there is a problem to the lock or unlock the door that is the same as below listed.

- Forgotten security code
- Electronic malfunction

※ Please slide the cover downward

⚠️ Caution

- Keep the mechanical override key in a safe place.
Otherwise, you may not get a free after-sales service even within during the warranty period.
6 Chinese Manual

简单提示
⚠️ 请充分的记住下面的核心功能！

1. 卡钥匙登记
   - 按一下 [登记键]
   - 要登记的卡钥匙接触[卡钥匙接触部]
   - 按一下 [登记键]

2. 密码登记
   - 按一下 [登记键]
   - 输入密码 (6-12位)
   - 按一下 [登记键]

3. 从外部锁定
   自动锁定状态时，
   - 在自动锁定感应器作用下关门，5秒内门将自动锁定。
   - 手动锁定状态时，用手掌触摸室外的密码键，就会锁定。

4. 从外部开启
   ① 接触到
   - [卡钥匙接触部]
   ② 用手掌触
   - 摸室外部
   - 密码键
   - 输入已
   - 登记的
   - 密码
   - 用手掌触
   - 摸室外部
   - 密码键

5. 自动 / 手动锁定设置
   ① 设置自动锁定
   - 按 [A] 按钮
   ② 设置手动锁定
   - 按 [M] 按钮

6. 强制锁定功能
   ① 内部强制锁定
   - 选 "LOCK"
   ② 外部强制锁定
   - 用手掌触摸室外密码键
   - 卡钥匙接触5秒
   - 输入密码后，按 [A]键3秒

7. 声音调整功能
   - 无声音 ： "0"
   - 小声音 ： "1"
   - 大声音 ： "2"

8. 解除人侵警报声方法
   ① 把已登记的卡钥匙接触到卡钥匙接触部，或者，
   ② 输入密码，或者，
   ③ 按 [A] [登记键] 5秒

9. 电池完全耗尽时可以从外部提供电源
   提供9V电池的状态下，可以使用卡钥匙或密码开门。
   （※电池另购）
1. 卡钥匙登记  
   请把要登记所有卡钥匙一块儿登记！

   ① 按 *[登记键]*
   ② 把要使用的卡钥匙依次接触到接触点
   ③ 按 *[登记键]*
   ④ 登记确认

2. 密码登记

   ① 按 *[登记键]*
   ② 输入密码(6~12位)
   ③ 按 *[登记键]*
   ④ 登记确认
3. 从外部开启

卡钥匙开启

1. 接触到 [卡钥匙接触部]
2. 开启确认

密码按键开启

1. 用手掌触摸密码键
2. 输入已登记的秘密
3. 用手掌触摸密码键，或，按一下“*”键
4. 开启确认

Note
- 用手掌触摸密码键时，不要穿手套！
- 卡钥匙接触后，锁没有反应时，请先用手掌触摸密码键。
虚数技能开启门

1. 用手掌接触。
   用手掌轻轻接触室外的数字键。

2. 按任意数(虚数)和密码键。
   虚数 ◆ 按密码键或者密码键 ◆ 按虚数。
   ▶ 注意
   3分钟后在下一个正常认证时为止不能使用虚数技能。

3. 用手掌接触或者按 * 号键。
   用手掌轻轻接触室外的数字键或者按下 * 号键结束。

4. 确认
   和音乐声一起锁定状态被解除。

注意

- 输入5次错误密码时 3分钟锁状态会运作。
- 3分钟运作后在下一个正常认证时(安全钥匙, 卡钥匙, 指纹, 正常密码, 内部开启门)为止虚数技能会停止运作,
  所以使用正确的密码开启门。

Note

- 虚数技能适合用在害怕密码被盗时使用最佳。
4. 自动/手动锁定设置

自动锁定设置
本产品装有自动锁定传感器，在自动锁定状态下关门，5秒内自动锁门。
